

Company Policy for the Environment

DMA is aware of the impact that its business can have on the environment and considers respect for the environment as an integral part of its business.

With this focus, it undertakes to:

- comply with applicable environmental regulations, both legal and those signed by the company;
- evaluate the environmental aspects of its activities, products and services and adopt management procedures that guarantee environmental protection;
- eliminate, as far as technically possible, or minimize emissions, discharges, waste, the use of hazardous substances and the consumption of raw materials and energy;
- train all employees to encourage proposals and initiatives aimed at respecting and protecting the environment.
- periodically analyze the environmental aspects related to the activities carried out, assessing the related impacts taking into account the context of the ecosystem and requests from interested parties;
- comply with applicable environmental legislation and signed requirements;
- improve environmental performance by:
 - involvement and empowerment of personnel on environmental protection issues and by promoting separate waste collection;
 - contextual involvement and strengthening of the environmental awareness of the interested parties;
 - to favor suppliers capable of ensuring services that are as compliant as possible with respect to environmental issues and in line with REACH and RoHS2;
 - entrust the waste disposal services to suppliers that guarantee suitable means of transport in order to reduce the impact deriving from emissions into the atmosphere and which favor recovery rather than disposal activities;
 - communicate the principles of environmental sustainability to suppliers, customers and interested parties.

The management of environmental aspects is entrusted to the Quality Management System Manager who coordinates the actions necessary to respect the environmental aspects, verifies their effectiveness, proposes improvement actions and provides support for their implementation.
